A new typology of policies to tackle health inequalities and scenarios of impact based on Rose’s population approach

2012-09-17 09:46:07 By ruimonteirospi.pt

A paper lead by Dr Joan Benach (Health Inequalities Research Group, Employment Conditions Network) provides a review of Graham’s typology of policies and for each type, potential scenarios of impact on population health and health inequalities are depicted following the idea of Geoffrey Rose’s population curves and strategies, policy examples are given and a simulation with survey data is shown.
